

Born2BeRoot G

Do not lose your Born2BeRoot : get a ...

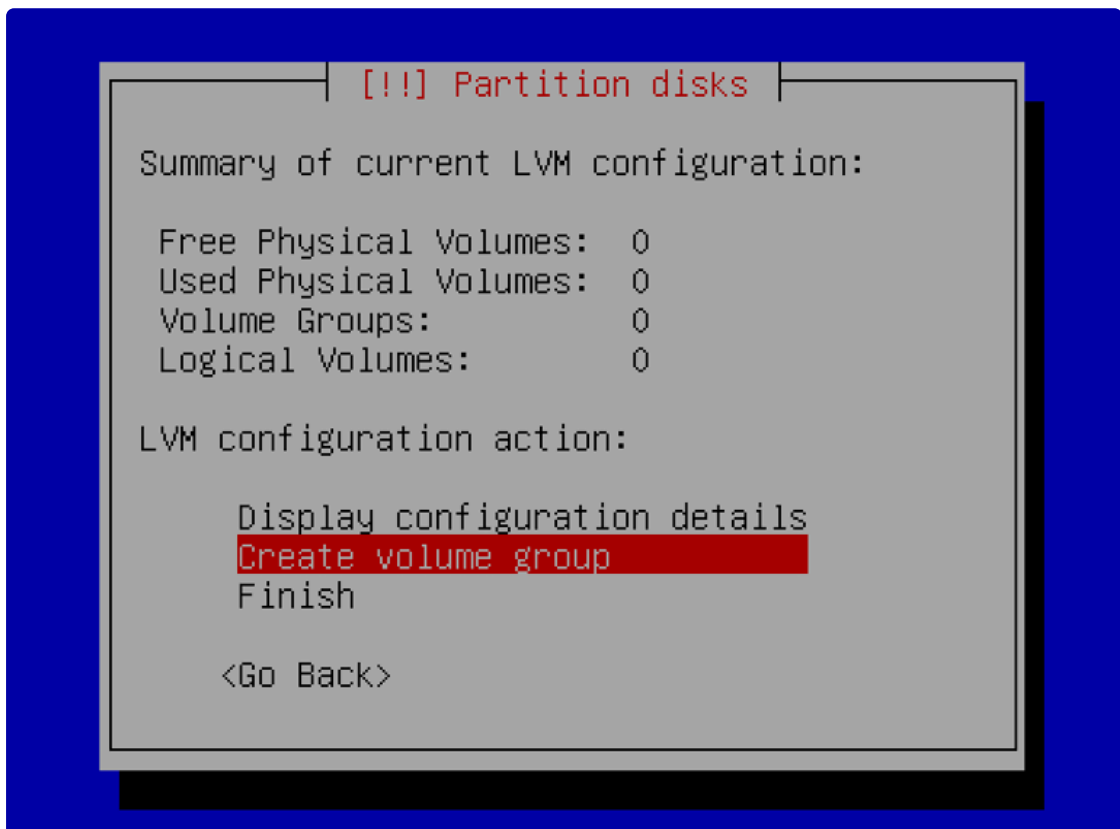

[Installing Debian](#) > [BONUS: Partition Disks](#)

Copy

BONUS: logical volume group

1. We will create a new volume group. Volume groups group partitions.

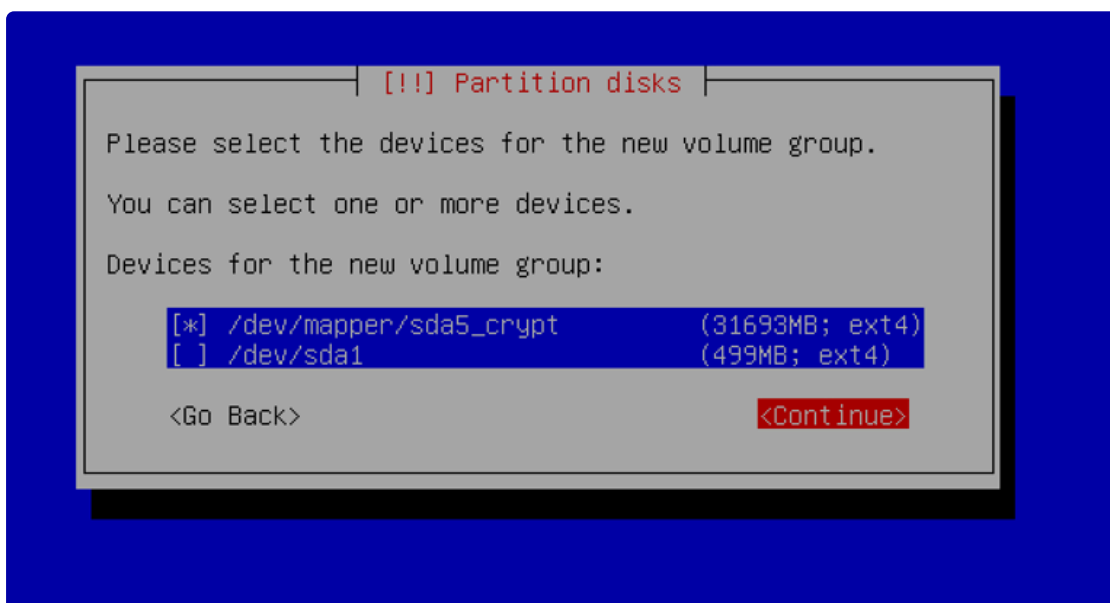

Partition disks configuration on Debian

2. We will enter the name we want to give it. `LVMGroup` as indicated in the subject.

Partition disks configuration on Debian

3. We will select the partition where we want to create the group.
