

[Installing Debian](#) > [BONUS: Partition Disks](#)[Copy](#) [v](#)

BONUS: logical volume swap

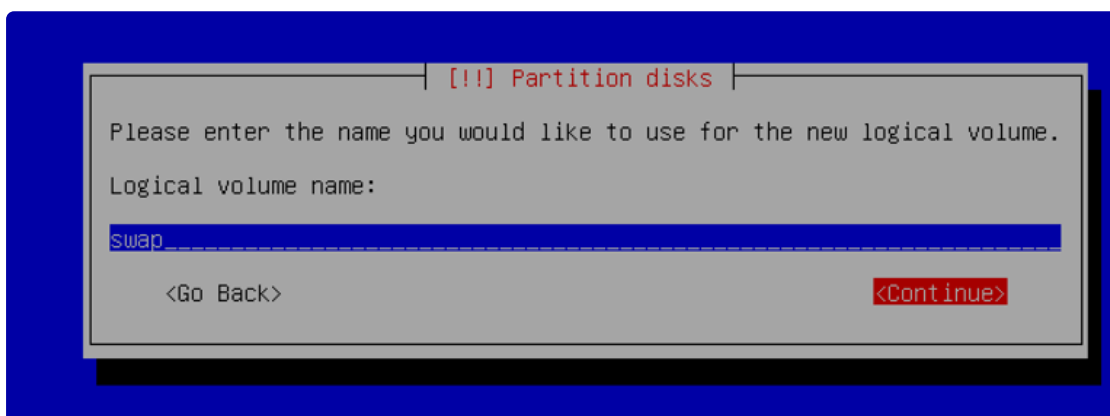

1. We repeat the process for `swap`. We only change the name and size.

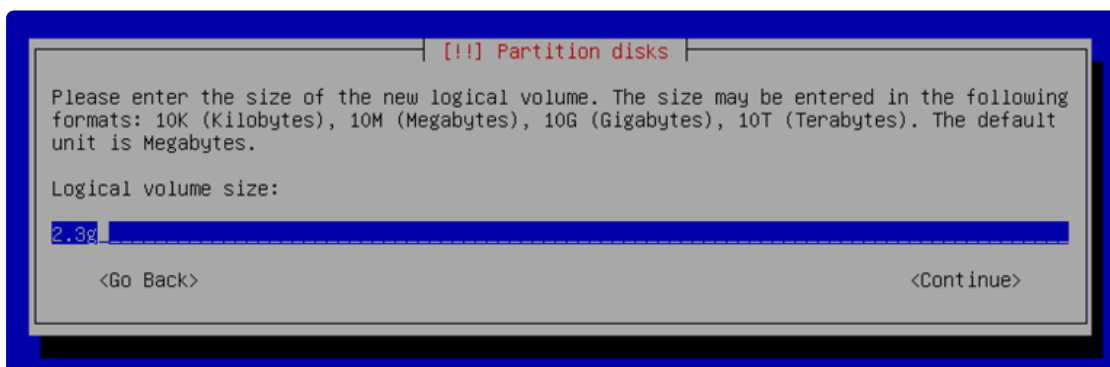

2. Select `LVMGroup`

3. Write **swap** name and

4. Write **2.3g** and

[Previous](#)
BONUS: logical volume root

[Next](#)
BONUS: logical volume home
