

Born2BeRoot G

Do not lose your Born2BeRoot : get a ...

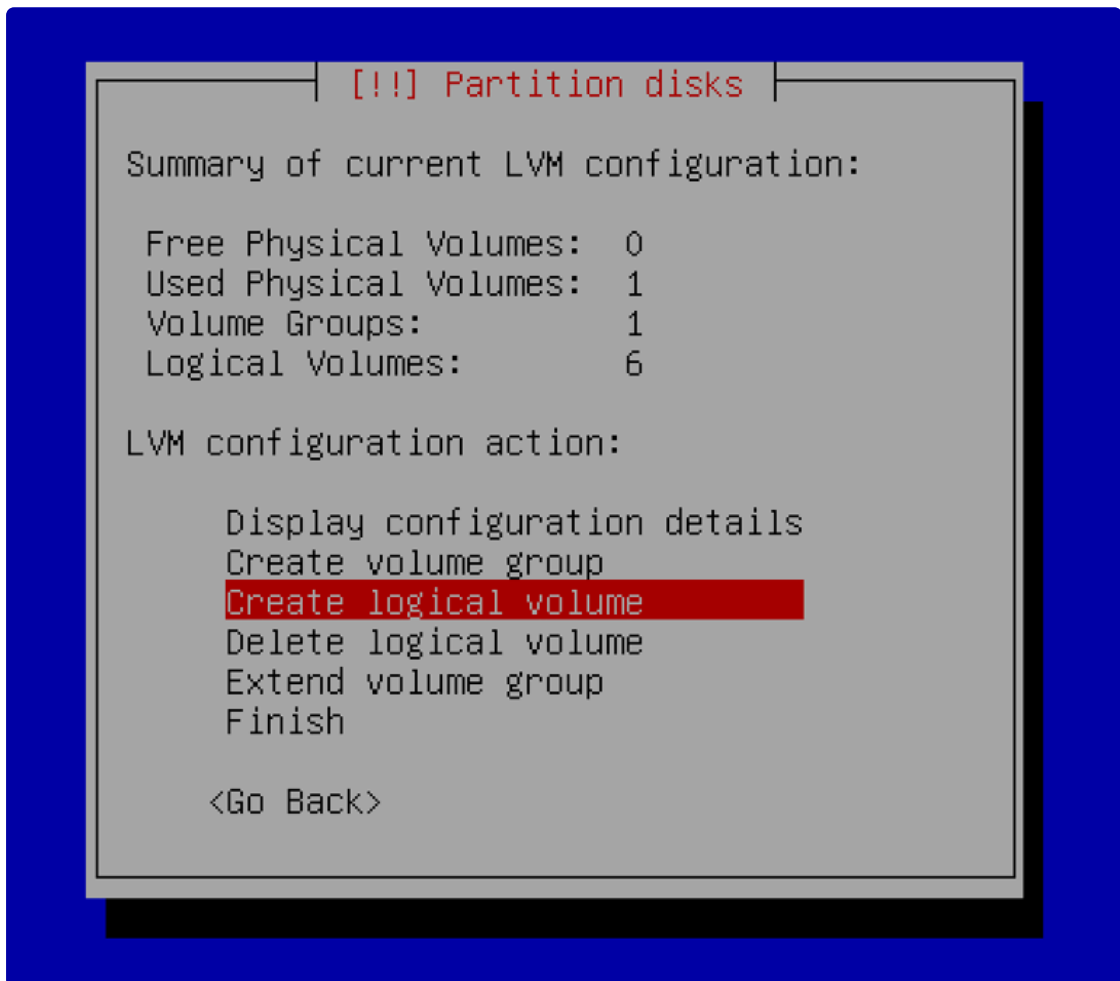

[Installing Debian](#) > [BONUS: Partition Disks](#)

Copy

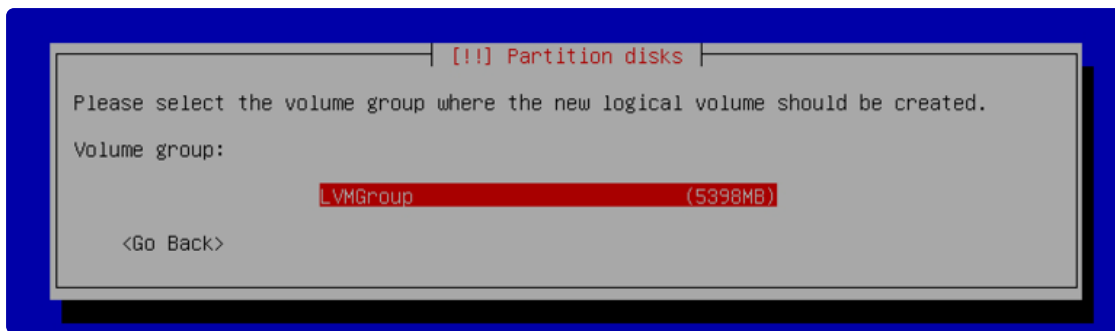

BONUS: logical volume var-log

1. Finally, we repeat the process for `var-log`. We only change the name and size.

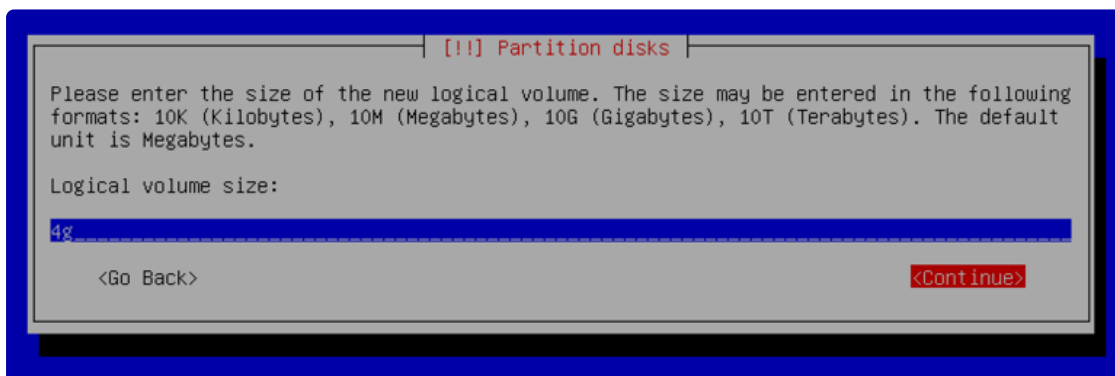

2. Select `LVMGroup` and `continue`

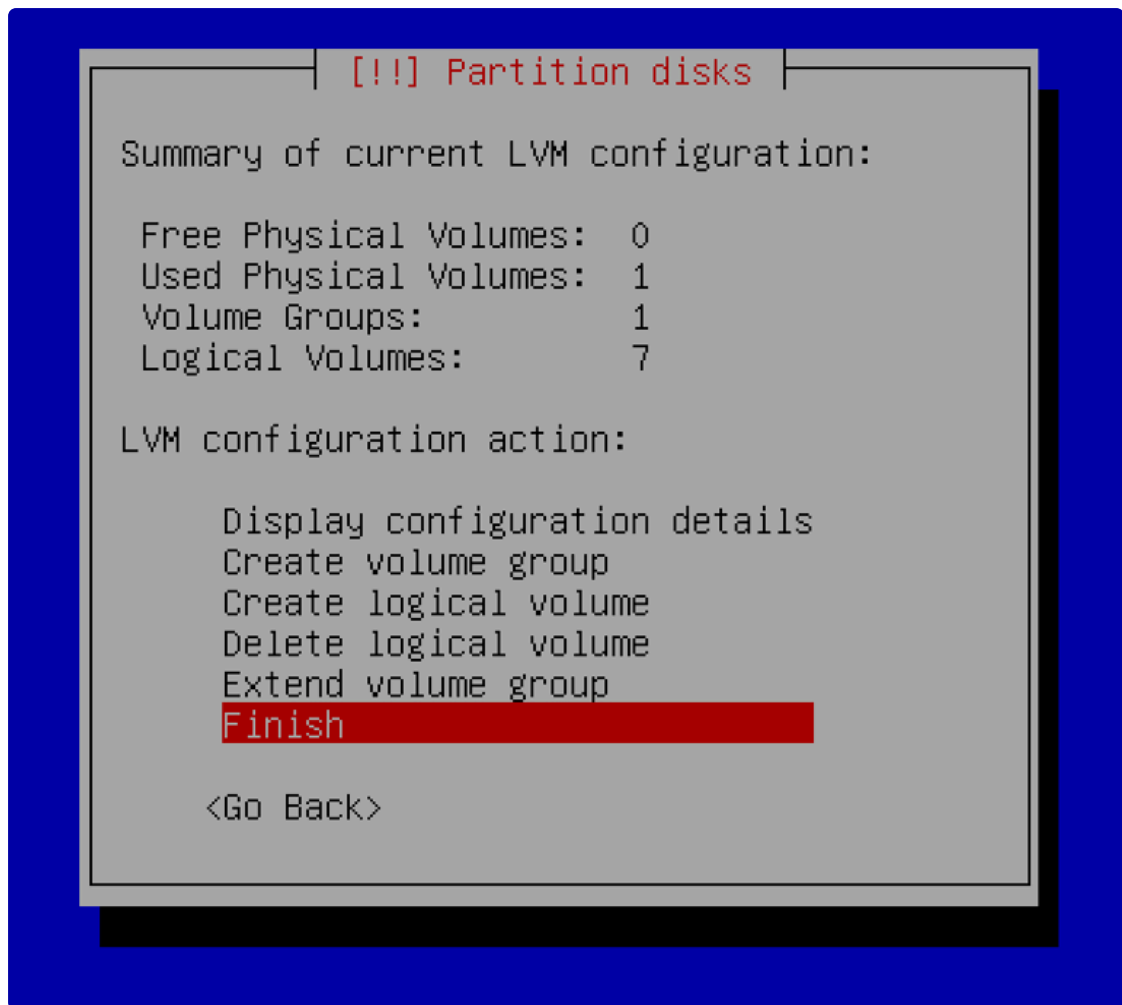

3. Write **3g** and

4. Write **4g** and

5. Once we have completed all the previous steps, we will finish the configuration of the logical volume manager.
