

Born2BeRoot G

Do not lose your Born2BeRoot : get a ...

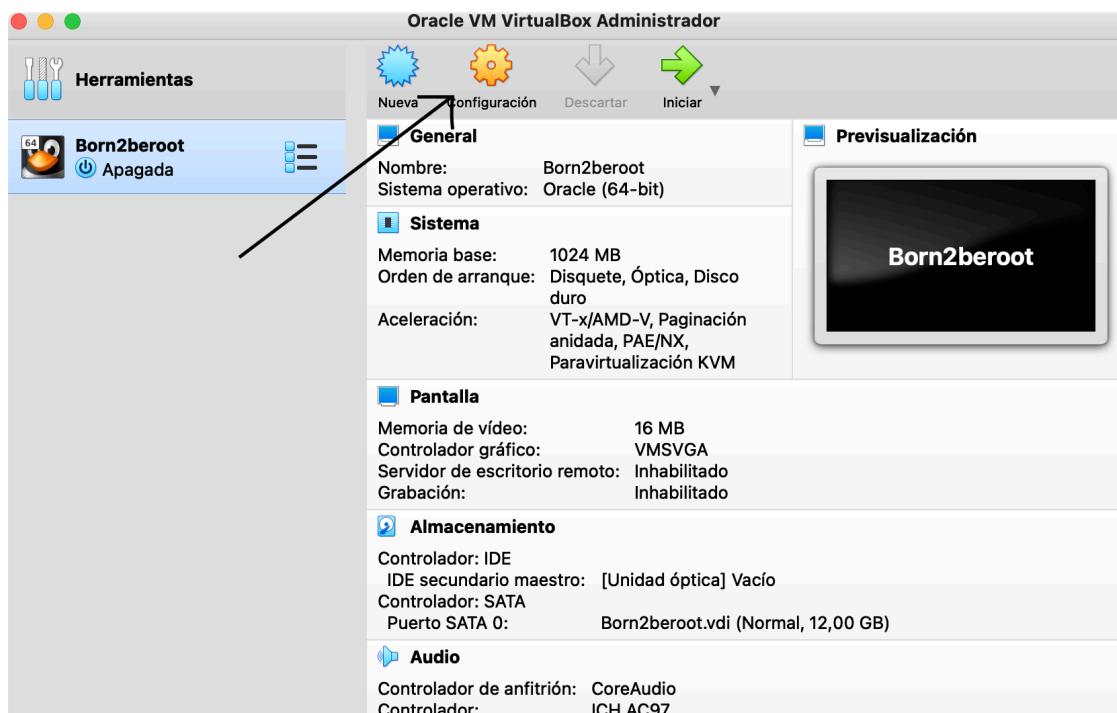

Installing the virtual machine

Copy

Attaching ISO to VirtualBox

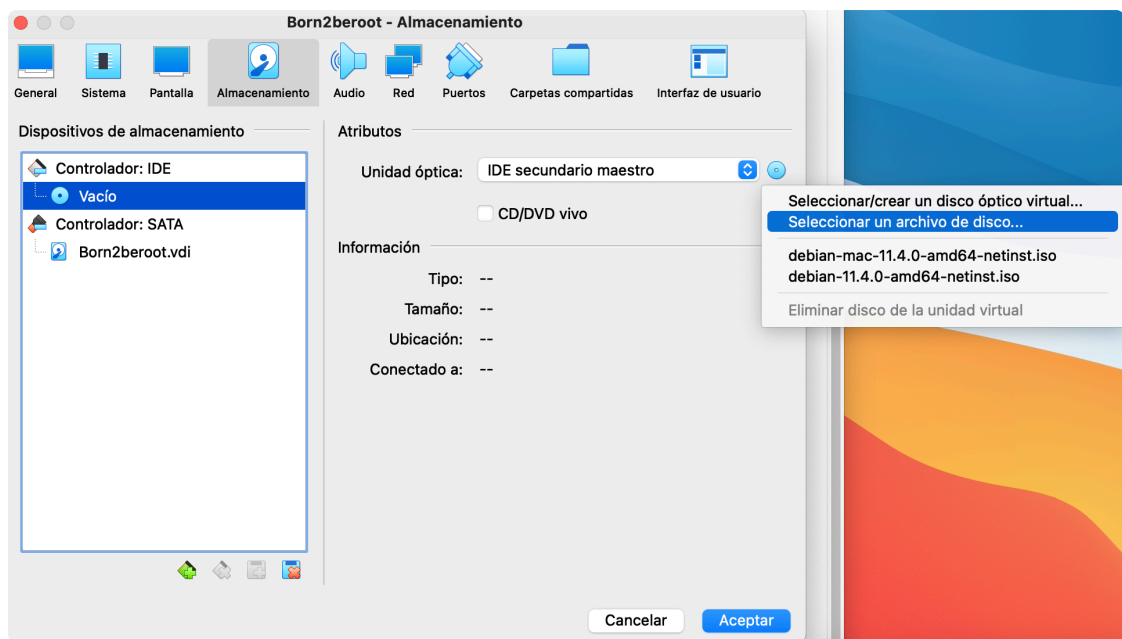

It might seem that we have already finish the installation , but there's still some steps to do.

1. Click on `Settings`.

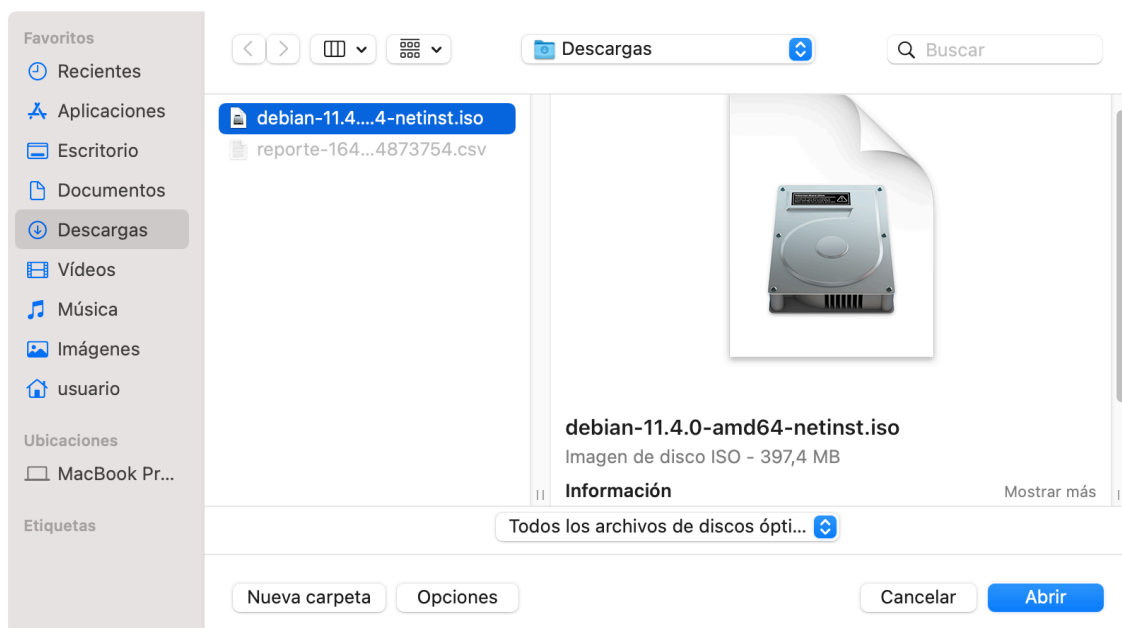

Dash board of the virtual machine

2. Now click on `Storage` , again click on the that we find on the right and click on `Choose a disk file`.

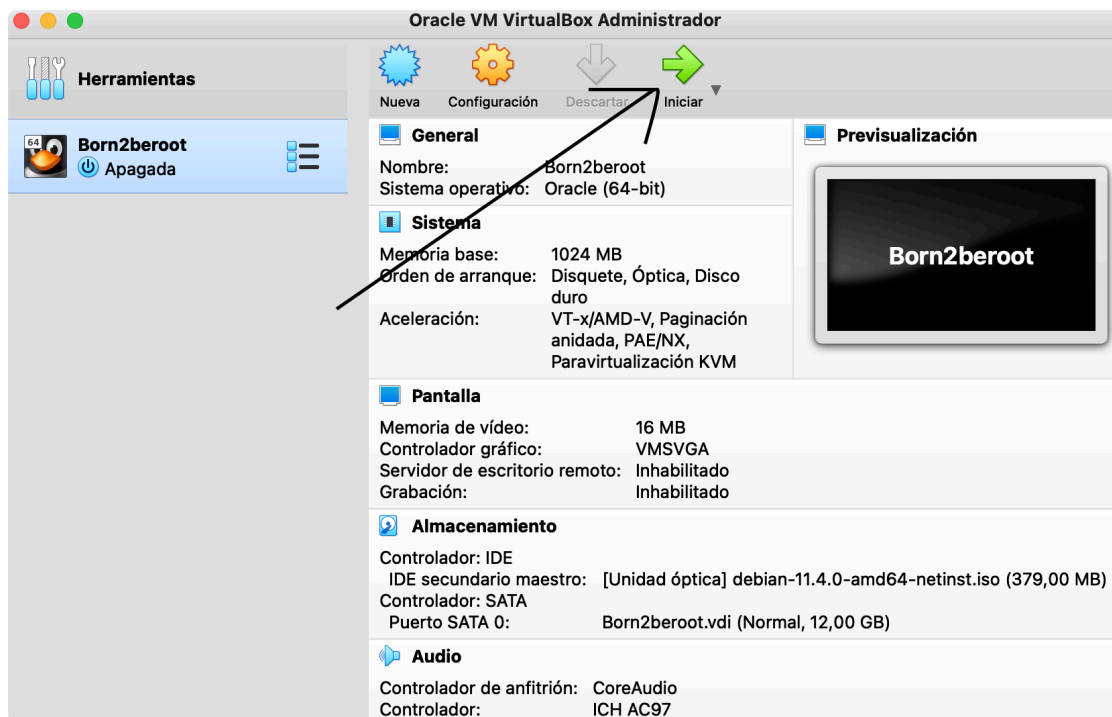

Disk memory settings of the virtual machine

3. Select the ISO that we just downloaded and click **Open**, then click on **Ok**.

Selecting ISO file

4. Once all this steps have been completed we can **Start** our new virtual machine.

Start virtual machine from VirtualBox

Pro Tip: Don't forget to track your progress on <https://born2beroot-tracking.pages.dev/> ↗
