

Born2BeRoot G

Do not lose your Born2BeRoot : get a ...

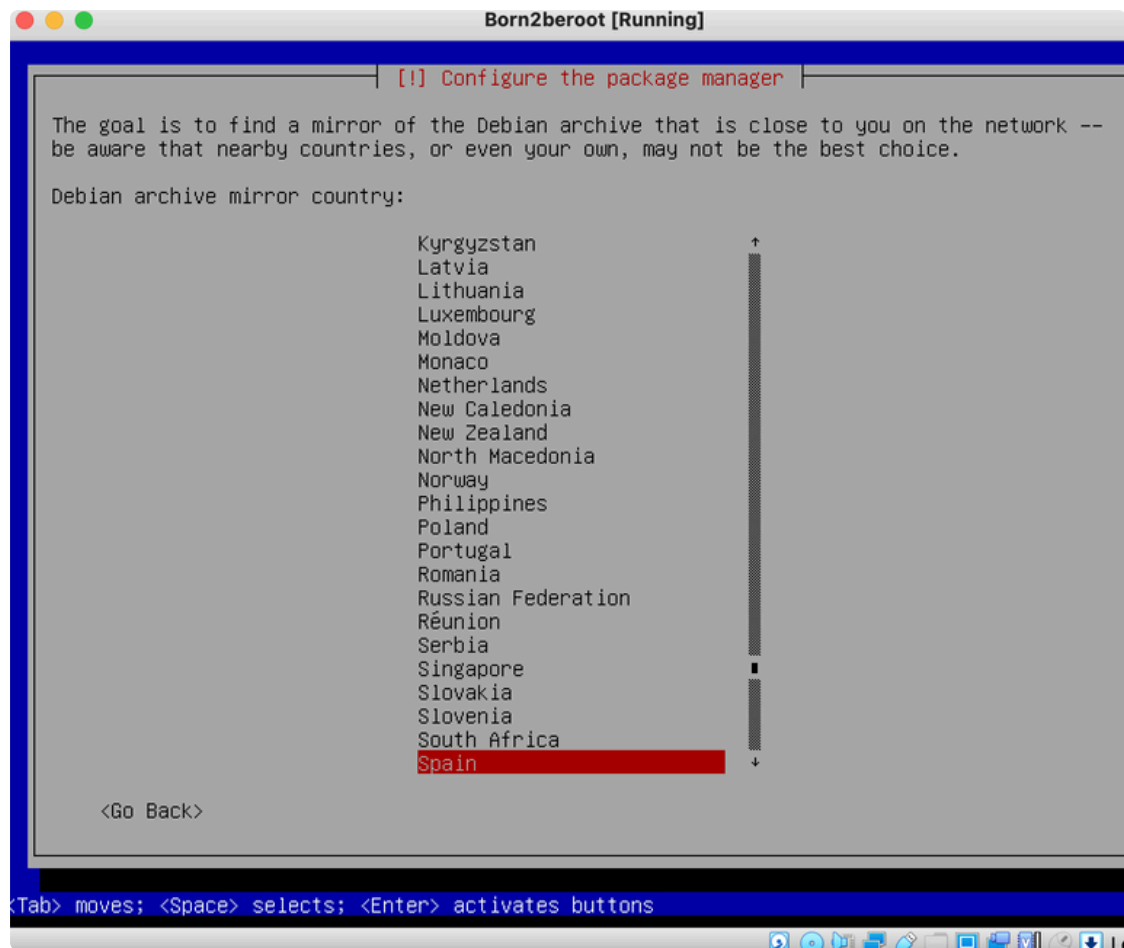

[Installing Debian](#)[Copy](#)

Configure the package manager

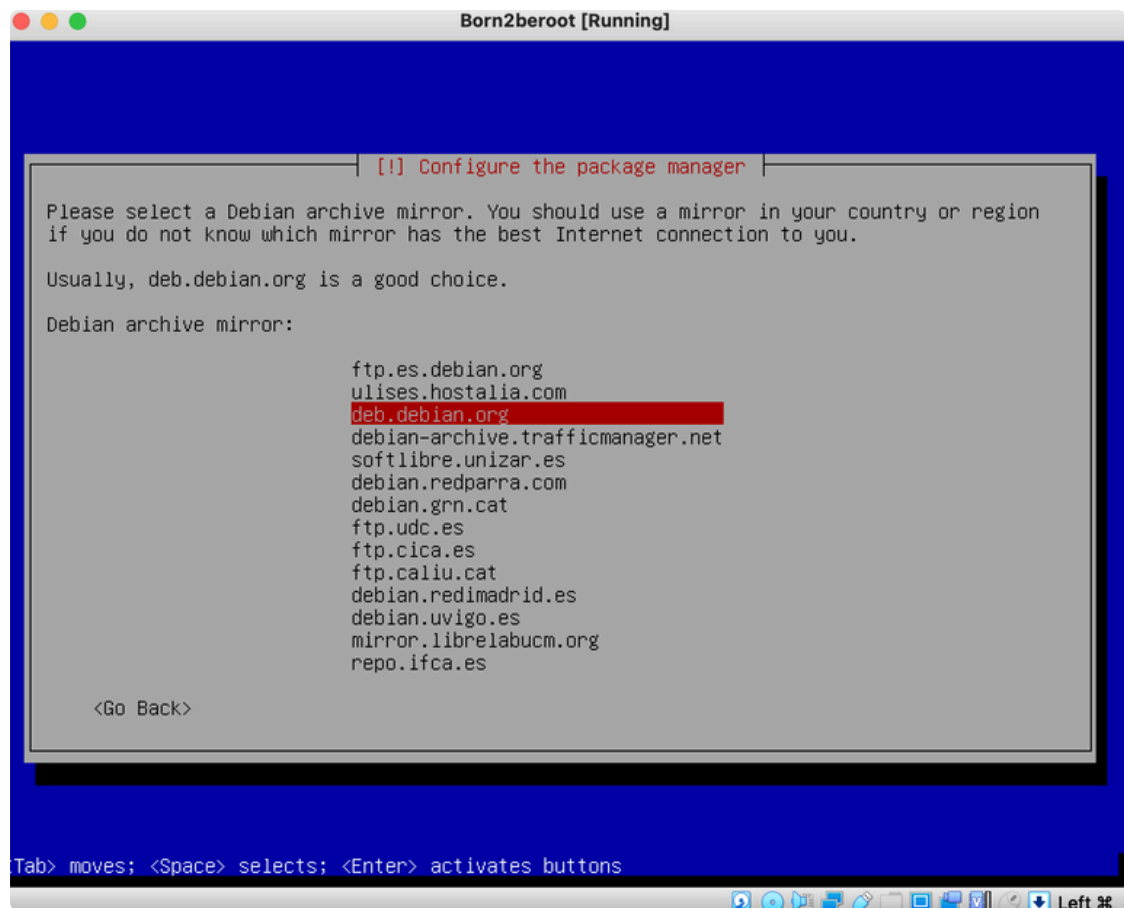

1. We select the option as is not required additional packages.

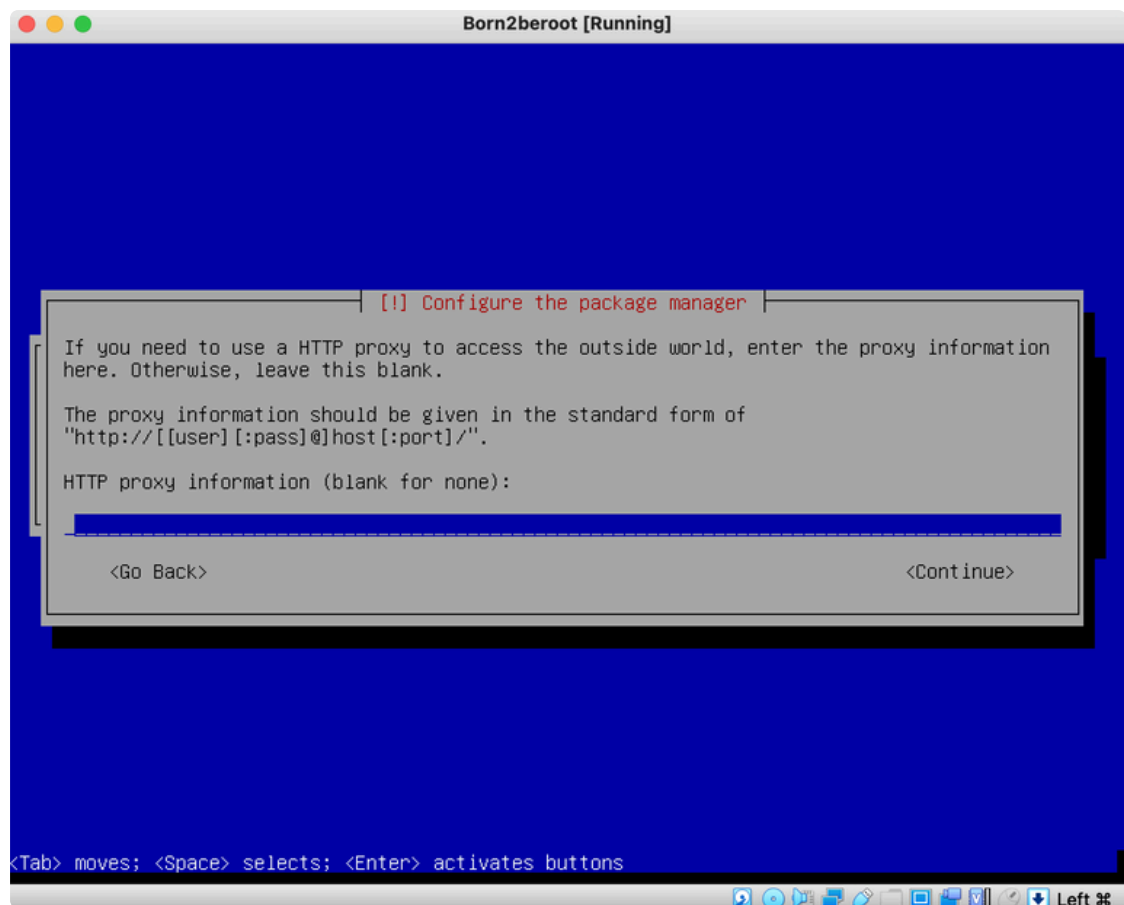

2. We choose our Country.

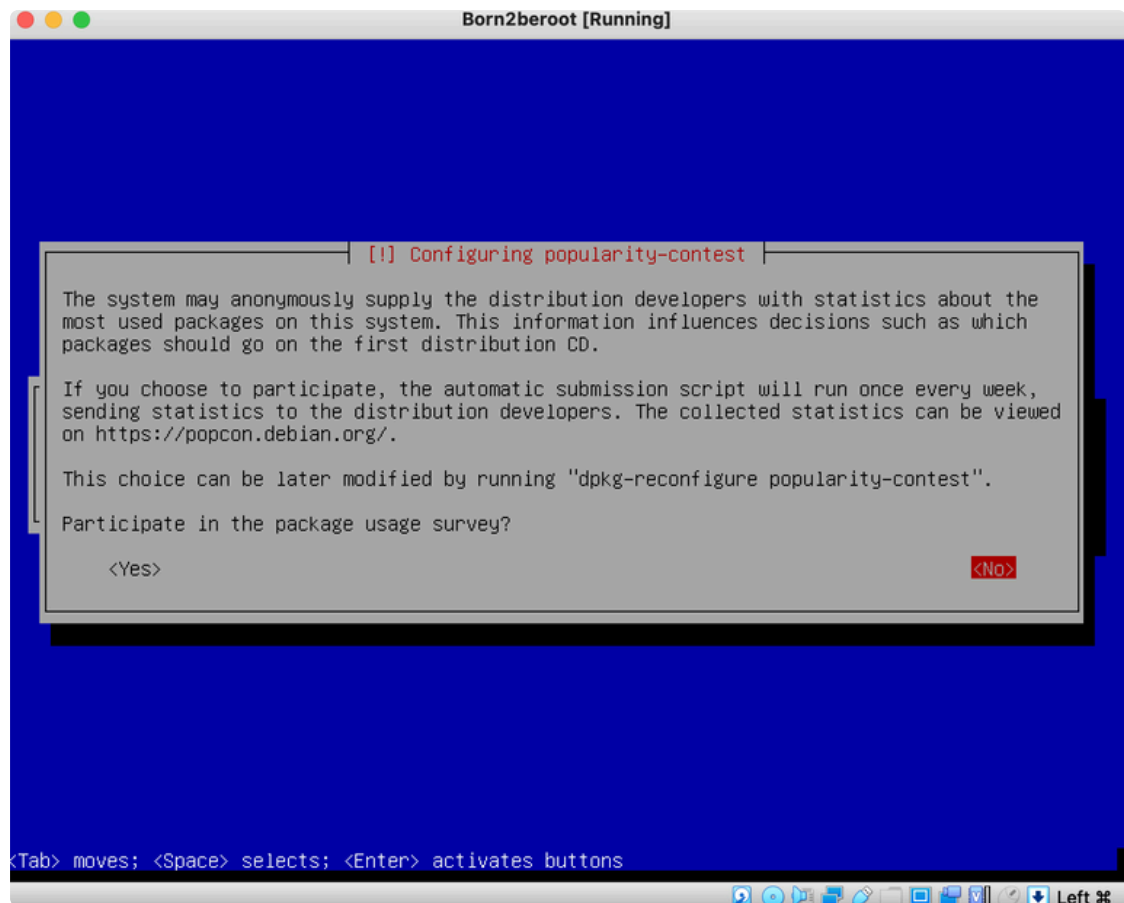

3. We choose `deb.debian.org` as is the recommended by debian itself.

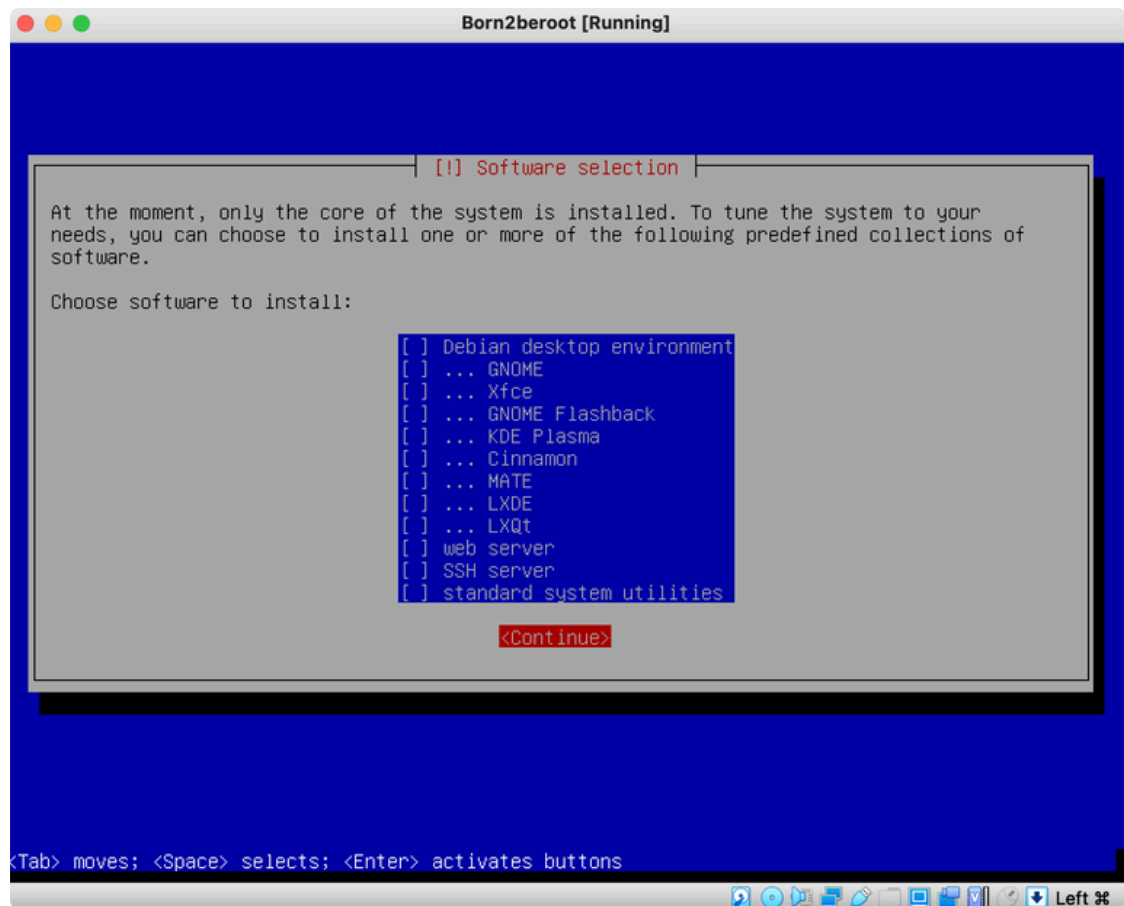

4. We will left this option blank and we click on **Continue**.

5. We select the option as we want to remain out of the statistics.

6. We will left in blank all software choises (with the space bar) and click on .
