

Born2BeRoot G

Do not lose your Born2BeRoot : get a ...

Virtual machine setup

Copy

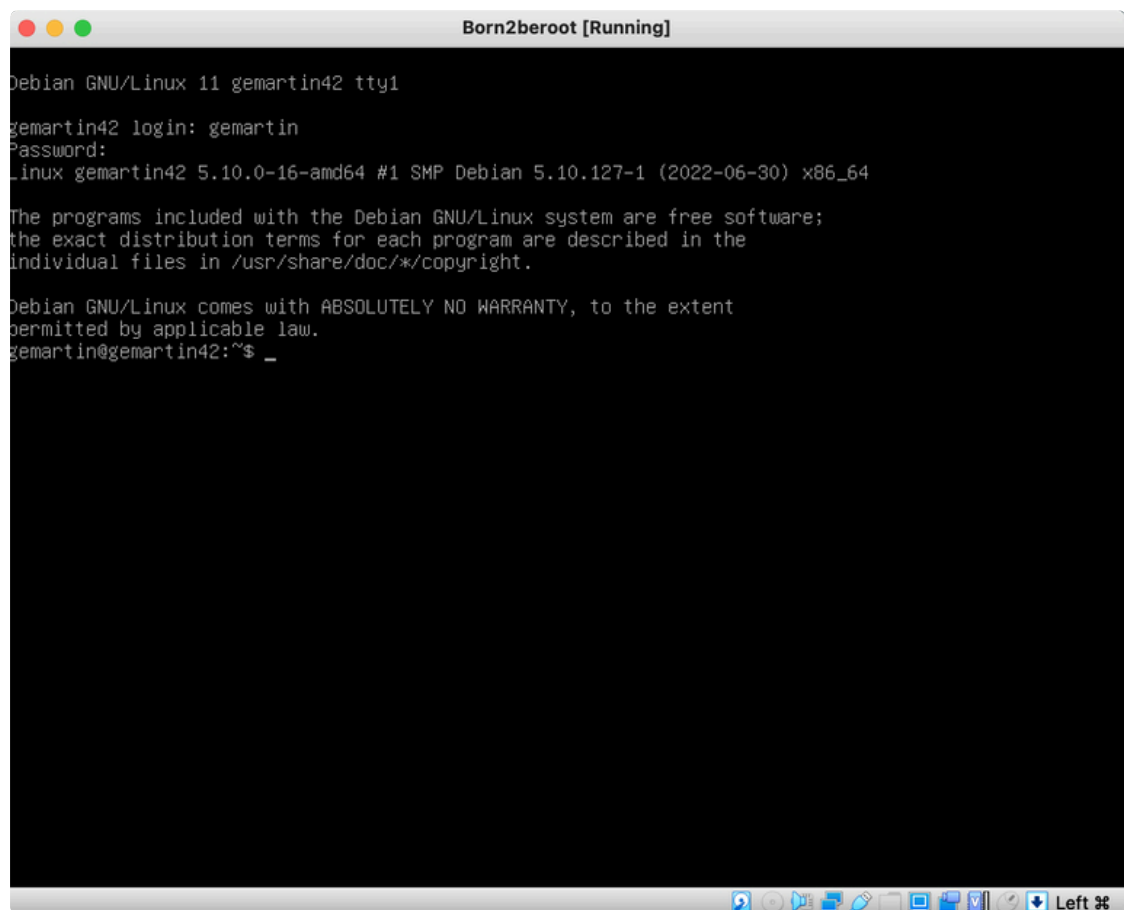

First connection

Booting into your virtual machine

1. **Select boot option:** First, select `Debian GNU/Linux` from the boot menu.
2. **Enter encryption password:** You will be prompted to enter the encryption password that you set during installation. In our example: `Hello42bcn`.

```
Born2beroot [Running]
Volume group "gemartin42-vg" not found
Cannot process volume group gemartin42-vg
Volume group "gemartin42-vg" not found
Cannot process volume group gemartin42-vg
Please unlock disk sda5_crypt:
```

3. **User login:** After unlocking the encrypted drive, enter the username and password you created during installation. In our example: username `gemartin` and password `Hola42spain`.

```
Debian GNU/Linux 11 gemartin42 tty1
gemartin42 login: gemartin
Password:
Linux gemartin42 5.10.0-16-amd64 #1 SMP Debian 5.10.127-1 (2022-06-30) x86_64

The programs included with the Debian GNU/Linux system are free software;
the exact distribution terms for each program are described in the
individual files in /usr/share/doc/*/copyright.

Debian GNU/Linux comes with ABSOLUTELY NO WARRANTY, to the extent
permitted by applicable law.
gemartin@gemartin42:~$ _
```

Once logged in successfully, you'll have access to your Debian system and can proceed with the next configuration steps.
